

MEPS HC-229H: 2021 Home Health File

Release date: May 2023

This public use data file is one in a series of event-level public use data files drawn from the 2021 Medical Expenditure Panel Survey (MEPS) Household Component (HC). The Home Health File contains household-reported information on home health visits including the type of provider, type of services received, length of the visit, reason for the visit, expenditures, and sources of payment. Released as an ASCII file with SAS, SPSS, STATA, and R programming statements and in a SAS transport file, a SAS V9 file, a XLSX file, and a Stata file, this public use file provides information on home health care for a nationally representative sample of the civilian noninstitutionalized population of the United States and can be used to make estimates of the utilizations and expenditures associated with home health care during the 2021 calendar year. This file consists of MEPS survey data obtained in the 2021 portion of Round 7, and all of Rounds 8 and 9 for Panel 23; the 2021 portion of Rounds 5 and 7, and all of Round 6 for Panel 24; and the 2021 portion of Round 3 and all of Rounds 4 and 5 for Panel 25; and Rounds 1, 2, and the 2021 portion of Round 3 for Panel 26 (i.e., the rounds for the MEPS panels covering the calendar year 2021). This year, 2021, is the first data year to include four panels of data. Because of concerns about lower response rates due to COVID-19, Panels 23 and 24 were extended to include 9 rounds of data collection; data for Rounds 7, 8, and 9 for Panel 23 and Rounds 5, 6, and 7 for Panel 24 are included in the 2021 data files. To append person-level information such as demographic or health insurance coverage to each event record, data from this file can be merged with the 2021 MEPS HC Full-Year Consolidated file using the person identifier, DUPERSID. For more details on loading MEPS PUFs into R, SAS, and Stata, please visit the [MEPS GitHub page](#).
