Data Files

There are 184,450 records for 2000. More information on participation is available in the States Conducting Surveillance by Year table. The data files are provided in ASCII, dBase, and SAS Transport formats. The July 16 update removed 1662 records for Hawaii because of concerns about data collection procedures, and the July 22 update corrected the _FRTINDX and _FV5SRV variables. The October 8 update corrected miscoded race values in four months of data from Illinois. SMART BRFSS and BRFSS GIS Maps data and documentation are also available for this data year.

[2000 BRFSS Data \(ASCII\)](#) [ZIP – 16 MB]

Data Updated October 8, 2004

This file is in ASCII format. It has a fixed record length of 950 positions.

[Variable Layout](#) [PDF – 46 KB]

Format information on variable name by column position.

[2000 BRFSS Data \(SAS Transport Format\)](#) [ZIP – 26 MB]

Data Updated October 8, 2004

This file was exported from SAS V8.2 in the XPT transport format. This file contains 294 variables. This format can be imported into SPSS or STATA. Please note: some of the variable labels get truncated in the process of converting to the XPT format so they may be slightly different from what is on the SASOUT00.SAS program.

SAS Resources

The following files are included for use with SAS software developed by SAS Institute, Inc. The SAS files are programs that can be read using any text editor. Save SAS files as plain text files.

[FORMAT00.SAS](#) [SAS – 58 KB]

SAS for Windows program used to generate the 2000 format library.

[formas00.sas](#) [SAS – 16 KB]

Format library used with the 2000 BRFSS SAS Data File.

[sasout00.sas](#) [SAS – 27 KB]

SAS for Windows program to convert the ASCII file into a SAS dataset.

[transprt.sas](#) [SAS – 3 KB]

SAS for Windows program to convert the XPT (SAS Transport) file into a SAS dataset.

[formas00.sas](#) [SAS – 16 KB]

SAS for Windows format assignment statements.
